

## **CIRCUIT BREAKER TRAINER MODEL: - IPC-1800-CBT**

### **DESCRIPTION:-**

The main contact in the IPC-1800-CBT is protected by means of an automatic shut-off against an overload. The three magnet relays and their contacts are easily accessible through the input / output terminals. This feature makes it possible to operate the circuit breaker with heavy loads. Another area application using this method is experiment the start/stop characteristics of an induction motor with three phase along with a Y,  $\Delta$  transformation.

### **SPECIFICATION:**

- Main Circuit Breaker ----- Load Current 20A, 3Phase.
- Magnet Contact ----- 9A x 3 way & aux- contact  
(1-Make, 1-Break)  
(2, 3) 13A x 3 way & aux contact 1-Make
- Overload Protection ----- current controlled (magnet contact 1,2,3)
- Terminals ----- 20A Binding post (2 colors)
- Indicators ----- lamp indications
- Input power ----- 380V 3 Phase or 220V Single Phase.
- Connecting Leads
- User Manual.

NOTE: We reserve the rights to change the shape and design of the trainer without prior notice.
