

# IPC EDUCATIONAL TRAINERS

## **COLOR T.V TRAINER MODEL: - IPC-104-B**

IPC-104-B is suitable for theoretical and practical study of color TV. The main PCB is mounted in the specially designed cabinet. The complete block diagram is distributed on panel. i.e. antenna cum tuner, IF amplifier cum detector, FM detector and audio output, Video amplifier, sync. Separator, Horizontal Oscillator, Vertical oscillator and vertical output, power supply. PAL decoder system. Infra red remote control receiver with hand held remote controller. The provision is available to insert faults that commonly occur in various stages can be simulated individually or combined with each other, through the faults simulation panel.

Channel system: 100 channels, Hyper Band Tuner, and 24 Hours Programmable TV ON /OFF. A/V In/Out, auto voltage regulator, convenient sleep timer, and remote control, high power Audio Output, 10 Watts, picture tube 14 inches. Operate on 220 V 50Hz.

**Note:** - we reserve the right to change the shape & design of the trainer without prior notice.
