

IPC EDUCATIONAL TRAINERS

Model: IPC-BR-54 is a basic Hermetic refrigeration system, trainer. It guides student engineers in detecting faults and repair of: Domestic refrigerators, domestic freezers, bottle coolers and domestic air conditioners. The Model: IPC_BR-54 consists of Hermetic condensing unit with fan cooled condenser, front mounted evaporator with suction accumulator, liquid line drier, compound gauge, pressure gauge, suction & discharge service valves.

Model: IPC-BR-54 has electronic digital temperature readout to measure the condenser outlet temperature, evaporator-inlet temperature and evaporator-outlet temperature. It can simulate five different kinds of faults in the system i.e., excess discharge pressure, faulty compressor, blocked capillary, overcharged system and undercharged system. Also have control switches with indicator lights for faults selection. The system operates on 220V 50Hz & refrigerant R-134a.

L x W x H 40 x 30 x 30 inches.

Note: - we reserve the right to change the shape & design of the trainer without prior notice.
