

IPC EDUCATIONAL TRAINERS

IPC-AT-5000 ANTENNA TRAINER (6.GHz Frequency)

Antenna Trainer comprises of following instruments / components.

No.	Description	Qty.
1	C-Band Transmitter with mounted Horn Antenna	1
2	C-Band Receiver cum power meter mounted on turntable	1
3	Dipole Antenna	1
4	Pyramidal Horn Antenna	2
5	Yagi-Uda Antenna	1
6	Helical Antenna	1
7	Microstrip Patch Antenna	1
8	Parabolic Reflector Antenna with dipole disk feed	1
9	Rhombic Antenna	
10	Folded Dipole Antenna	
11	4 Element Patch Antenna Array	1
12	Double Dipole Array	1
13	Cables SMA(m) to SMA(m)	2

All of the antennas are fed by panel mount SMA (f) connector to attach with transmitter and receiver. An operating manual which contains the comprehensive information about all items will be provided. It also describes how to use the apparatus and perform the experiments adequately.

Note: - we reserve the right to change the shape & design of the trainer without prior notice. Ijaz Parvez &Co, 3 Hall Road Lahore Ph # 042-35424363, 37351722 Email: - babar_intiaz@yahoo.com
